

IFRS S1 STARTER KIT

A Practical Guide to Building Your First Sustainability Report

Version 1.0

Welcome

Thank you for downloading the **IFRS S1 Starter Kit**.

Preparing an IFRS S1 sustainability report can be challenging, particularly if you're starting from a blank page. This Starter Kit has been created to provide a practical starting point by demonstrating how sustainability-related disclosures can be organised and presented in a structured report.

Rather than simply providing a blank template, this kit is designed to help you understand the reporting process and adapt the content to reflect your own organisation.

What's Included?

1. Sustainability Reporting Draft (Word)

An illustrative sustainability report prepared for a fictional **Professional Services** company.

The report demonstrates how IFRS S1 disclosures may be presented, including:

- Governance
- Strategy
- Sustainability-related Risks and Opportunities
- Metrics and Targets

The content is intended to help you understand the overall structure of an IFRS S1 report and develop disclosures appropriate for your own organisation.

2. Metrics & Targets Companion Workbook (Excel)

A practical workbook designed to support preparation of the sustainability report.

The workbook includes:

- Illustrative sustainability metrics
- Example activities
- Suggested targets
- Practical guidance
- Space to customise the information for your own organisation

The workbook is designed to work alongside the Sustainability Reporting Draft and assist you in developing meaningful disclosures.

How to Use This Starter Kit

For the best experience, use the files in the following order:

Step 1

Read this Start Here Guide.

Step 2

Review the Sustainability Reporting Draft to understand the overall structure of an IFRS S1 report.

Step 3

Open the Metrics & Targets Companion Workbook and customise the information to reflect your organisation.

Step 4

Update the Sustainability Reporting Draft using the information developed in the workbook.

Important Information

This Starter Kit is intended as an educational and practical learning resource.

The report has been prepared using **Samyag Synergy Pte. Ltd.** as a fictional example to demonstrate how IFRS S1 disclosures may be structured for a small professional services company.

It is **not** an actual sustainability report and does **not** contain real company information, performance data, or sustainability disclosures.

Every organisation has different sustainability-related risks, opportunities, governance arrangements, strategy, and metrics. Users should carefully review and adapt all content to reflect their own circumstances before using it.

Who Will Benefit from This Starter Kit?

This resource is suitable for:

- Accountants
 - Sustainability Professionals
 - Consultants
 - Small and Medium-sized Businesses
 - Business Owners
 - Students
 - Anyone looking to better understand IFRS S1 reporting
-

Feedback

This is **Version 1.0** of the IFRS S1 Starter Kit.

Your feedback is valuable and will help improve future editions. If you have suggestions or ideas for additional Starter Kits, I would be pleased to hear from you.
